GAME NAME: CYCRAFT (INITIAL D3, CLUB KART)

SUBJECT: ● LINK CABLE BETWEEN MCU BOARD AND NAOMI PCB

The cable for the Cycraft is different from a normal LAN cable. It is so to speak cross cable which Rx(receiver), and Tx(Transmitter) lines inside the cable is twisted. CROSS cable. If you use normal LAN cable (No Cross type) for Cycraft between MCU board and NAOMI board, machine shows ERROR "Broken connection" message on Monitor.
