I. GAME INSPECTION

S.C.I. has been thoroughly tested and readied for operation at the factory and should not require any special set-up procedure. However, it is suggested that upon receiving your game you examine the following to further insure the game is in proper working condition:

CHECK:

[ ] Plug-in connectors are firmly seated.
[ ] All player control connections are complete.
[ ] No loose components on the printed circuit boards.
[ ] Fuses are installed firmly in holders.
[ ] Coin mechanisms are operating properly.
[ ] No loose foreign objects in cabinet (screws, components, etc.)
    which may cause shorting and result in damage to the game.

If problems do occur or technical assistance is required, please call our Customer Service Department at 708/520-9280.

II. POWER REQUIREMENTS

The game is shipped ready for operation at 120VAC, 60Hz with a power consumption of approximately 250 watts.

C A U T I O N

FOR SAFE OPERATION IT IS STRONGLY RECOMMENDED THE CABINET BE PROPERLY GROUNDED. THIS GAME IS EQUIPPED WITH A THREE CONDUCTOR POWER CABLE. THE THIRD PRONG (round in shape) WILL AUTOMATICALLY GROUND THE GAME WHEN PLUGGED INTO A PROPERLY GROUNDED THREE PRONG RECEPTACLE. IF IT BECOMES NECESSARY TO USE AN ADAPTER, THE GROUNDING LUG OR WIRE ON THE ADAPTER MUST BE PROPERLY GROUNDED TO ASSURE SAFE OPERATION.

III. GAME INSTALLATION

The following precautions should be followed when installing the game:

* Handle the game with care so as not to damage the fragile picture tube.

* Do NOT install the game in direct sunlight or near a heat source. Doing so might cause the internal temperature of the game to exceed it's maximum operating temperature and could result in damage to the game's components.

* Do NOT install the game in excessively dusty or damp environments.

IV. GAME INSTRUCTIONS

S.C.I. is a fast-action driving game in which the player pursues wanted criminals. The player must race against time through city back-roads, country dirt-roads and the winding curves of a mountain side. He must use skill in maneuvering around such dangers as falling rocks, opened bridges and even the crashing of waves onto an ocean-front highway. A vibrating steering wheel enhances the experience by simulating the feeling of driving over rough terrain.

* The controls include a vibrating steering wheel, a gun/turbo shifter combination and a three position accelerator pedal for speeding, coasting and braking.
* The player drives a high speed car in pursuit of the criminal's car or target vehicle.
* A scale indicating the distance to the target vehicle is shown on the right side of the screen.
* While in pursuit, a timer counts down the time given to catch up to the target vehicle.
* Before the player can apprehend the criminal, he must first fight off a criminal gang of motorcyclists by bumping them off the road.
* When the player is in range of the target vehicle, the timer resets to give the player more time, a siren sounds and an arrow appears to identify the target vehicle.
* Using two methods, ramming into and shooting, the player cripples the target vehicle.
* When shooting, a gunsight appears to assist the player in aiming accurately.
* A scale indicating the amount of damage to the target vehicle appears on the left side of the screen.

VI. SELF-TEST MODE

A. TO ENTER THE SELF-TEST MODE

1. Turn power OFF.

2. Locate Dip Switch Bank A on the main logic PCB
    and slide switch #3 to the ON position.

3. Turn power ON.

The game will automatically conduct a test of its rom
and ram memory and indicate if a problem is found.

* ROM/RAM & COLOR MONITOR TEST -   This screen is the first to
                                    appear in the self-test mode.

* SWITCH/FUNCTION TEST MODE -   Press the START button to
                                    enter this test.

└─────────────────────────────────────────┘
```

B. ROM/RAM & COLOR MONITOR TEST

1. During the first stage of this test, the game conducts a
    self-test of its ROM and RAM memory and indicates if a
    problem is found.

2. During the second stage of this test, the screen displays a
    color bar and crosshatch pattern to assist in adjusting the
    color monitor.

D. SWITCH/FUNCTION TEST MODE

1. Press each game control switch to test. While depressed,
    the corresponding display for that switch will change from
    OFF to ON. This indicates the switch is operating properly.

```

```

2. To test the game sounds, rotate the steering wheel to the right or left until the desired sound address appears next to the **SOUND CODE** display. Then press the START button to activate that sound.
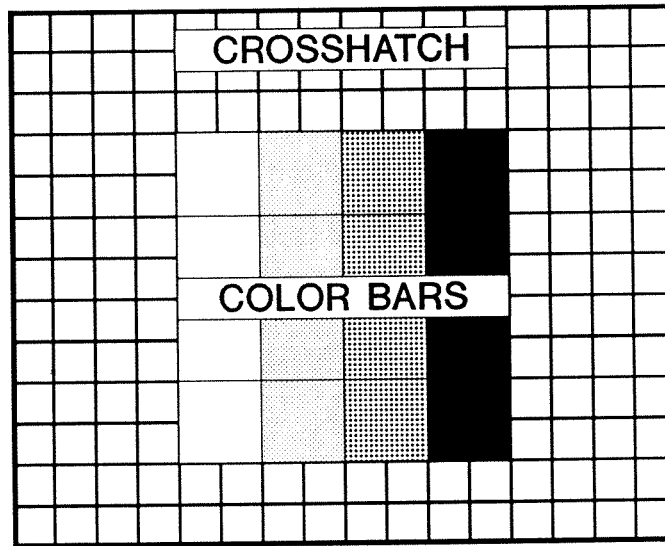

E. TO EXIT THE SELF-TEST MODE

1. Turn Power OFF.

2. Locate Dip Switch Bank A on the main logic PCB and return switch #3 to the OFF position.
3. Turn Power ON.

OPTION DIP SWITCH SETTINGS

The following option switch settings were designed to allow the customizing of S.C.I.'s various game features to suit different environments. If used wisely, the flexibility they offer can maximize game performance and increase potential earnings.

DIP SWITCH A

FUNCTION	SETTING	1	2	3	4	5	6	7	8
GAME STYLE	COCKPIT *UPRIGHT	OFF ON							
NONE	MUST REMAIN IN "OFF" POSITION		OFF						
TEST MODE	*NORMAL TEST			OFF ON					
ATTRACT SOUNDS	*ENABLED DISABLED				OFF ON				
PLAY PRICING	1 CO = 1 PL *2 CO = 1 PL 3 CO = 1 PL 4 CO = 1 PL					OFF ON OFF ON	OFF OFF ON ON		
CONTINUE PRICING	SAME PRICING *1 CO = CONT 2 CO = CONT 3 CO = CONT							OFF ON OFF ON	OFF OFF ON ON

* = FACTORY RECOMMENDED SETTINGS.

CONTINUE PRICING – THIS SWITCH ALLOWS YOU TO PRICE THE "CONTINUED" GAME DIFFERENTLY THAN THE INITIAL GAME. AN EXAMPLE WOULD BE AN OPERATOR WHO ALLOWED HIS PLAYERS TO CONTINUE AT A DISCOUNTED RATE.
EXAMPLE: PLAY PRICING IS SET AT (2 COINS = 1 PLAY) AND THE CONTINUE PRICING AT (1 COIN = 1 PLAY). THE PLAYER PAYS THE FULL AMOUNT (2 COINS) TO BEGIN PLAYING, THEN PAYS ONLY HALF AS MUCH (1 COIN) TO CONTINUE HIS GAME. WHEN THE CONTINUE PRICING IS SET AT "SAME PRICING", THE CONTINUED GAME IS PRICED THE SAME AS THE INITIAL GAME.

DIP SWITCH B

FUNCTION	SETTING	1	2	3	4	5	6	7	8
DIFFICULTY LEVEL	*B - MEDIUM A - EASY C - HARD D - HARDEST	OFF ON OFF ON	OFF OFF ON ON						
INITIAL TIMER	*60 SECONDS 70 SECONDS 65 SECONDS 55 SECONDS			OFF ON OFF ON	OFF OFF ON ON				
NUMBER OF TURBOS	* 3 5					OFF ON			
STEERING RADIUS	270 DEGREE *360 DEGREE						OFF ON		
CONTINUE PLAY WITH DAMAGE	*NO YES							OFF ON	
SIREN VOLUME	*NORMAL LOW								OF ON

* = FACTORY RECOMMENDED SETTINGS.
