II. BASE DE DONNEE PLICI

Syntaxe : **Nom_de_table** – champ1 : type, champ2 : type, …
Type : s=string, i=int, r=real, d=date

Un produit est composé d'un t_product_master et de plusieurs t_product_slaves (déclinaisons ex : Tshirt rouge xl, bleu L, etc.).
Les pages sont contenues dans t_page, il ne faut en aucun cas les supprimer directement en SQL car elles sont gérées par intervalle (bord gauche, bord droit).
On peut vérifier l'intégrité des pages par SuperAdmin->Administration->Vérification->Pages->Choix de la base de donnée->Vérification.
